ISOLATION PADS

Cambridge natural rubber isolation pads are designed to reduce vibration and noise from refrigeration and air conditioning equipment. Each pad has a circular design that offers a suction cup effect, eliminating the need to fasten the pad down. These pads come in 18" squares but can be made into smaller segments by cutting or tearing the 81 2" x 2" segments into the size that is required. They withstand a load of 180 psi with great resilience.

CONDENSER PADS

Cambridge's line of stackable, durable condenser pads, in both Graphite™ (gray) and Onyx™ (black), are UV-rated and have chemical resistance, which protects them from cracking and weathering. Available in a range of sizes, each pad disperses the weight of the A/C unit to keep it from shifting or sinking.

TERMINALS

PVC

PVC terminals have excellent insulation and flame retardancy.

NYLON

Nylon terminals have an added durability to their insulation and flame retardancy.

PE

Weatherproof terminals have a layer of PE surrounding them. Once heated, it shrinks around the wire creating a weatherproof seal.

See our electrical accessories catalog for a full line of bulk-packed terminals

YELLOW-COATED GAS CONNECTORS - 3/8" OD | 1/2" OD

YELLOW-COATED GAS CONNECTORS

Cambridge yellow-coated gas connectors are composed of the same material as our uncoated gas connectors (corrosion-resistant 304 stainless steel) but include an industry-standard yellow coating for added corrosion protection and easy gas line identification. The coating is consistent along the entire length of the connector hose, providing complete coverage and protection from chemical and/or weather-based corrosion. They are CSA-certified and share the same features, benefits, and applications as Cambridge standard gas connectors.

- Corrosion-resistant 304 stainless steel
- Flared-end fitting
- Added corrosion protection and easy gas line identification
- Indoor and outdoor use
- CSA certified for use with natural gas
- ANSI Z21.24, Z21.75/CSA 6.10, 6.27

If you do not see a size you need listed, please contact our sales team. We can customize any part. Lead times may apply.

GALVANIZED RIGHT LEFT MERCHANT COUPLINGS

STZ right left merchant couplings feature a right-hand thread on one end and a left-hand thread on the other, allowing both pipes to tighten simultaneously by rotating only the coupling—ideal for fixed piping runs where pipe rotation is not possible. Made from durable steel, each coupling is 100% pressure-tested and factory protected for long-lasting performance. Suitable for residential gas, air, and low-pressure applications.

*For use with drinking water

*Always check your local plumbing and gas codes before starting any piping projects

HYDRO SWITCH | HYDRO ELBOW FLOAT SWITCH | HYDRO TEE FLOAT SWITCH HYDRO TRAP KIT WITH CLEAR J-TRAP | HYDRO TRAP KIT WITH OVERFLOW SWITCH

HYDRO SWITCH

The Cambridge hydro switch prevents flooding by detecting even a drop of moisture and shutting down the A/C system. The switch has a triangular shape unlike others on the market, allowing it to be placed in the corner of a drain pan. It works with A/C units, dehumidifiers, washing machines, dish washers, refrigerators, water heaters, and more. Easy to install with simple 4-wire connection with push-to-test and push-to-reset options.
