PREMIUM QUALITY PLUMBING PRODUCTS

— AFFILIATE BRANDS —

For years, Cambridge Resources has been a primary source of premium quality cable management, hose clamps, pipe hanging, and HVAC support products to America's premier companies. In 2015, Cambridge acquired LDR as part of its family of companies. LDR has been manufacturing and selling plumbing supplies to home centers, hardware distributors, mass merchants, and farm supply houses since 1935.

WE PLEDGE TO OUR CUSTOMERS, SUPPLIERS, AND EMPLOYEES TO CONTINUOUSLY IMPROVE OUR PRODUCTS, PROCESSES AND OFFERINGS IN ORDER TO ENSURE THAT WORKING WITH CAMBRIDGE RESOURCES REMAINS THE MOST ENJOYABLE AND SATISFYING EXPERIENCE IN THE INDUSTRY.

Black

Black Malleable Fittings

Cambridge™ fittings are composed of durable black iron and are 100% pressure tested right at the factory. They are available in an array of sizes for residential gas, air, and lp applications.

*Not for use with drinking water

*Always check your local plumbing and gas codes before starting any piping projects

Black Nipples

Cambridge™ nipples are composed of durable, schedule 40 black steel. They are hydrostatically tested and available in sizes to fit residential and light commercial gas and air applications.

- *Not for use with drinking water
- *Always check your local plumbing and gas codes before starting any piping projects

Black Cut Pipe

Cambridge™ cut pipe is composed of durable, schedule 40 black steel and is hydrostatically tested and available in sizes to fit residential and light commercial gas and air applications. Our cut pipe has protective durable plastic end caps that help ensure the pipe threads remain undamaged in transport.

*Not for use with drinking water

*Always check your local plumbing and gas codes before starting any piping projects

Galvanized

Galvanized Malleable Fittings

Cambridge™ pipe and fittings are ideal when selecting water pipe for your residence. Our durable, galvanized malleable iron fittings are 100% pressure tested directly at the factory. They are available in sizes for all residential water applications.

*For use with residential drinking water applications
 *Always check your local plumbing and gas codes before starting any piping projects

Galvanized pipe and fittings can be used to add a branch line for an appliance like a washing machine.

SAFETY TIP:

Always use thread seal tape or joint compound on all male threads to seal threads. It prevents rust and makes assembly easier.

Galvanized Cut Pipe

Cambridge™ cut pipe is the way to go when selecting water pipe for your residence. Our durable, schedule 40 galvanized steel is hydrostatically tested and available in sizes to fit residential and light commercial water applications. Our cut pipe has protective durable plastic end caps that help ensure the pipe threads remain undamaged in transport.

*For use with drinking water

*Always check your local plumbing and gas codes before starting any piping projects

Dielectric Unions

Use Cambridge™ dielectric unions when joining galvanized and copper pipe. They create a non-conductive barrier between the different metals, which prevents electrolysis corrosion from occurring.

Valves

Valves

Cambridge™ offers a complete line of high quality valves to fit a wide variety of applications and connection types. All valves meet ANSI standards and ASTM standards and are 100% pressure tested. Our valve program is color coded for ease of shopping by the consumer.

Brass Gate Valves

Cambridge™ gate valves are used for on/off control with low pressure drop. They are used for main water shut off or water heaters and should be used in fully open/fully closed positions. They come in threaded, sweat, and compression connections.

Brass Stop Valves

Cambridge™ stop valves are ideal for regulating flow. They are used for most household applications and come in threaded, sweat, compression, and push fit connections. Stop and waste valves allow for drainage of the non-pressure side of the valve and are used for water lines that must be drained.

Brass Hose End Valves

Cambridge™ hose end valves are generally used for irrigation purposes.

Sillcocks

Sillcocks are an exterior wall valve used for garden hoses. Frostfree sillcocks extend the inside wall away from cold weather and prevent frozen pipes and freeze breaks. They come in threaded or sweat connections.

Boiler Drains

Commonly used as water heater drain, they also supply laundry tub. They have a garden hose connection outlet and allow for flow of water to be controlled. They come in threaded connections.

Hose Bibbs

Hose bibbs are outdoor faucet valves, also used to supply washing machines. They have an outlet for a garden hose connection, allow for flow of water to be controlled and are also available in a no kink configuration. They come in threaded, sweat and compression connections.

Washing Machine

Dual valve available for both hot and cold. They are made of rough brass or chrome plated and come in threaded or compression connections. They allow for the flow of water to be controlled.

Plastic

Plastic Valves

Cambridge™ plastic valves cover a wide variety of residential applications but are primarily used for drainage and irrigation/sprinkler systems. CPVC is used in hot-and-cold-water systems and is ideal for all potable water piping in typical residential structures. They are lightweight, non-corrosive, lead free compliant and come in threaded and slip connections.

PVC Pressure Fittings

Cambridge™ PVC Schedule 40 pressure fittings are used with cold water irrigation and sprinkler systems. They are lightweight, non conductive, non corrosive and impact resistant. Their high insulative value reduces sweating and their smooth surface reduces mineral build-up on surfaces. These fittings conform to ASTM D-2466, are NSF 61 and lead free compliant.

PVC DWV Fittings

Cambridge™ PVC DWV fittings are used for drain waste and vent systems. PVC Schedule 40 (and lighter) plastics are approved by many building codes for DWV. They conform to ASTM D-2665 and are lead free compliant.

*Not for use in pressure applications

*Always check your local building codes before choosing a pipe and fitting material

CPVC Fittings

Cambridge™ CPVC fittings are used for hot and cold water supply systems. They are lightweight, non conductive, non corrosive and have a high insulative value which reduces sweating. These fittings are rated at 400 psi at 73° F or 100 psi at 180° F, meet ASTM standard D-2846, are lead free and NSF 61 compliant.

Product descriptions, sizes and uses are clearly
and attractively marked to help eliminate customer
confusion.

Tubing & Insert Fittings

Cambridge™ offers a complete line of tubing and insert fittings along with a variety of packaging and display types.

Pack Styles:

Cambridge™ offers 4 kinds of convenient POP packaging to meet your retail needs. There is an easy to use basket system that fits on fixtures, and the spools fit common racks used in the industry.

Clear Braided Vinyl Tubing

Cambridge™ braided tubing is made of acid, alkali and chemical resistant PVC with nylon braid. It is used for chemical transfer, hydraulic lines, food and beverage lines, pneumatic lines, coolant lines, and vacuum lines. The tubing has a non-toxic FDA grade.

Fuel Line

Cambridge™ fuel lines are made from polyester reinforced PVC with blended additives for use with petroleum products and are ozone resistant. They are used in transfer of petroleum based products, fuel line, vapor emission line, and vacuum smog control. They are intended for fuel line vapor emission crankcase ventilation. These lines are not intended for fuel injection, biodiesel applications, or use with potable water. They are also not for use in under-hood applications.

Tubing Connectors

Flexible tubing is easy to connect using a variety of barbs, clamps and fittings.

Tubing connectors are made of various materials. The most common type of connector is a barb fitting, and the most commonly used are:

Tubes are sized by the inside diameter

Match the O.D. diameter of the fitting to the I.D. diameter of the tubing

Hose barbs slip into hoses for a snug fit that is not easily removed and can be secured with hose clamps. Heat the tubing if you have a problem with the blow dryer first.

SEE OUR CARDED CATALOG FOR OUR FULL LINE OF BRASS INSERT FITTINGS.

Nylon Insert Fittings

Cambridge™ nylon insert fittings have a high tolerance to heat and have corrosion resistant properties in many chemical applications. They are used to connect tubing and are commonly used with hose clamps.

Tools

Cambridge™ tools can be used with plastic pipe and fittings. They come in retail ready carded packaging.

Mini Tube Cutter

ITEM# 511 3110
QTY: 5/60

- Cuts plastic copper aluminum tubing 1/8" O.D. to 7/8" O.D.

Tubing Cutter

ITEM# 511 3120
QTY: 5/60

- Cuts plastic copper aluminum tubing 3/16" O.D. to 1-1/8" O.D.

Mini Hacksaw

ITEM# 511 5120
QTY: 5/60

- Cuts metal & plastic

PVC Pipe Cutter

ITEM# 511 5500
QTY: 10/50

- 1/2" x 1-1/2" PVC pipe cutter
- Cuts PVC pipe hose and synthetic tubing
- Easy handling ratchet system
- Cuts tubing up to 1-1/2" in diameter
- Cuts faster and cleaner than a hacksaw

PVC Pipe Cutter

ITEM# 511 5151
QTY: 10/50

- 1/2" x 1" PVC pipe cutter
- Cuts PVC pipe hose and synthetic tubing
- Easy handling ratchet system
- Cuts tubing up to 1" in diameter
- Cuts faster and cleaner than a hacksaw

Clamps

PEX Pinch Clamps

Cambridge™ PEX pinch clamps are made with heavy duty 304 stainless steel and are safe for potable water and radiant floor heating. They are all NSF listed to ASTM F2098 standards.

- ASTM standard F2098
- 304 stainless steel

PEX Pinch Clamps

PART NUMBER	TUBE SIZE Inches (mm)	OPEN DIAMETER mm	WIDTH Inches (mm)	INNER QTY	MASTER QTY

Pneumatic Tool

ITEM# CPT-103

- Use with 1/2" & 3/4" PEX clamps
- Comes with carrying case

Pinch Clamps

Cambridge™ pinch clamps have a specialized tongue-in-groove design which provides a full 360° seal, and a smooth-edge band that prevents damage to hoses. They are ideal for both flexible and inflexible thin-walled hoses. Cambridge pinch clamps are constructed of 100% 304 stainless steel and have a tamper evident design. They are available in custom open diameters.

- 304 stainless steel

Pinch Clamp Crimper

ITEM# CSC-102

- Installs every standard pinch clamp, regardless of size
- Unique "Tab" design provides crimping access in hard-to-reach spaces
- No gauging or tool calibration necessary
- Fully compliant with ASTM F-2098 specifications
- Constructed of high quality carbon steel
- Ratcheting action to ensure a sufficient grip

Hose Clamps

Cambridge™ hose clamps are multi-purpose clamps used to seal hoses or pipes onto fittings. They are easy to use and provide a tight and secure hold. The Standard hose clamps exceed 60 inch-pounds of torque.

FLEXIBLE CONNECTORS

HOOK-UP & REPAIR

Cambridge™ flexible fittings are designed to be used above or below ground with cast iron, steel, copper, plastic or clay piping

Color coding helps you find the right size every time.

All Cambridge™ flexible couplings have been tested and certified by IAPMO and comply with the applicable sections of the Uniform Plumbing Code and the International Plumbing Code.

Series 156 & 102 fittings are manufactured in compliance with ASTM C1173

Standard shielded no-hub couplings are manufactured in compliance with ASTM C1277. Heavy duty shielded no-hub couplings are manufactured in compliance with ASTM C1540

100% Stainless steel bands, screws & housing

All Hose Clamps	S/S Type
Material Type - band	301
Material Type - screw	304
Material Type - housing	301

CAPS, TEES & CONNECTORS

- Resistant to chemicals and normal sewer gases
- Connects pipes of same or different size quickly and easily
- Corrosion-resistant and rustproof stainless steel clamps
- For use above or below ground in non-pressurized applications

NO HUB SHIELDED COUPLINGS

- Connects no-hub cast iron pipe of the same size
- Standard and heavy duty applications
- Resistant to corrosion and cracking
- Flexes with ground movement
- For use below ground in non-pressurized applications

DONUTS AND GASKETS

- Easily connects DWV piping to cast iron sockets and hubs
- Forms a compression seal
- Eliminates the use of cement or lead products
- For use above ground in non-pressurized applications

Flexible Couplings

Cambridge™ flexible couplings are designed for above ground and underground applications. Because of their positive seal and leak proof attributes, they are used with drain, waste and vent piping. These couplings are resistant to chemicals and sewer gases and are unaffected by soil conditions.

Standard Gas Connectors

Cambridge™ standard gas connectors are composed of corrosion-resistant 304 stainless steel which provides extra strength while also maintaining flexibility. They feature a flared-end fitting for secure metal-to-metal sealing and are ideal for both indoor and outdoor use. They are CSA and UL Certified for use with natural gas. Cambridge™ standard gas connectors are great for use with kitchen appliances, gas ranges, and hot water heaters.

APPLICATIONS

Indoor	Outdoor	Manufactured Home
--------	---------	-------------------

Gas Ranges, Water Heaters, Tankless Water Heaters, Wall Heaters, Dryers, Gas Fireplaces, Furnaces, Garage Heaters

CSA Design Certified to ANSI Z21.24/CSA 6.10, Cambridge™ Gas Connectors are durable and reliable. Their flexibility makes them easy to install, especially in tight spaces. Use Cambridge™ Gas Connectors for all residential gas appliances knowing their design focuses on safety and peace of mind.

Stationary Outdoor Grills, Gas Fire Pits, Outdoor Dryers, Rooftop Units

CSA Design Certified to ANSI Z21.75/CSA 6.27, Cambridge™ Gas Connectors are perfect for outdoor installation of fixed appliances.

Mobile Home Gas Meters, Cross-over Gas Connection Kits

CSA Design Certified to ANSI Z21.75/CSA 6.27, Cambridge™ Gas Connectors are ideal for use in Park Trailers and Manufactured (Mobile) Homes. High BTU capacity enables proper gas flow.

STANDARD GAS CONNECTOR DESIGN complies with the following standards:	FEATURES	BENEFITS
ANSI Z21.24-2006/CSA 6.10-2006 Connectors for Gas Appliances	304 Stainless Steel	Durable, reliable, corrosion-resistant design
ANSI Z21.24a-2009/CSA 6.10a-2009 Addenda A to Connectors for Gas Appliances	Markings stamped on nut	Eliminates unnecessary vibration
ANSI Z21.75-2007/CSA 6.27-2007 Connectors for Outdoor Gas Appliances and Manufactured Homes	Annealed steel construction	Provides added strength and flexibility; reduces stress corrosion cracking risks
ANSI Z21.75a-2009/CSA 6.27a-2009 Addenda A to Connectors for Outdoor Appliances and Manufactured Homes	MIP fittings tapped female for next smaller size	Creates a metal to metal seal assuring critical application integrity and consistency
	CSA design certified for indoor/outdoor use with natural, manufactured, mixed, liquified, petroleum (LP), and LP-gas air mixtures	Quality, safety, peace of mind

Yellow Coated Gas Connectors

Cambridge™ yellow coated gas connectors are composed of the same material as our uncoated gas connectors (corrosion-resistant 304 stainless steel) but include an industry-standard yellow coating for added corrosion protection and easy gas line identification. The coating is consistent along the entire length of the connector hose, providing complete coverage and protection from chemical and/or weather-based corrosion. They are UL and CSA certified. All other features, benefits and applications are the same as Cambridge™ standard gas connectors.

Black Coated Gas Connectors

Cambridge™ black coated gas connectors are composed of the same material as our uncoated gas connectors but include an industry-standard black coating for added corrosion protection and low visibility. This gas connector is commonly used for installation of home appliances including space heaters, fireplaces, and gas log sets, and are UL and CSA certified.

Pipe Hanging

Pipe Hanging

Cambridge™ pipe hanging products are designed to support drain, waste and vent piping from rafters and joists. They allow for secure contraction and expansion of piping systems and can be used on copper, PEX, CPVC, and other CTS/DWV sized piping
