

## ELECTRICAL TAPE

### ET13710 LIQUID TAPE

#### Description

CAMBRIDGE™ LIQUID TAPE forms a protective dielectric coating on electrical connections to seal out moisture and prevent corrosion.

GREAT FOR USE ON: Boats, RV's, Cars, Trucks, Exposed Wiring, Lighting Fixtures, Bilge Pumps, Timers, and anything requiring a waterproof seal.

#### Features

- Waterproof connections completely
- UV resistant
- Does not peel or degrade
- Great for odd-shaped and/or hard-to-reach connections
- Absorbs vibration/prevents terminal screw slack
- Excellent flexibility
- Temperature range: -50°F to 275°F

#### DIRECTIONS:

Stir well before using. Wires or terminal to be sealed must be clean and dry. Brush or dip Liquid Tape onto electrical connection area. Allow to dry for 5 minutes and apply second coat if greater thickness of seal is needed. Succeeding coats may be applied at 5 minutes intervals to build up extremely thick protection. Product fully cures in 24 hours.

**CAUTION:** Always turn off power before starting electrical work. Consult local building codes to determine installation requirements.

**DANGER.** FLAMMABLE LIQUID AND VAPOR. HARMFUL OR FATAL IF SWALLOWED.

Contains methyl ethyl ketone. Do not use near heat, sparks or open flame. Use with adequate ventilation. Avoid prolonged breathing of vapors. Take precautions to avoid prolonged or repeated contact with skin. If swallowed, drink several glasses of water but DO NOT induce vomiting. Contact physician immediately. KEEP OUT OF REACH OF CHILDREN.
