

# Foam Insulation Tape

## Features:

- Easy application
- Reduces heat loss from hot pipes up to 160°
- Eliminates condensation from cold pipes
- Sticks firmly to all metals and to itself
- Closed cell structure, low K factor
- Will not dry or crack

Specifications	
<b>Application:</b>	Hot or cold piping, as well as other commercial and industrial instulation applications. Good for indoor and outdoor use.
<b>Composition:</b>	Made of 1/8"thick, lightweight black crosslinked polyethylene foam with synthetic rubber based adhesive on one side covered by white siliconized paper release liner for an easy peel.
<b>Composition:</b>	Made of 1/8"thick, lightweight black crosslinked polyethylene foam with synthetic rubber based adhesive on one side covered by white siliconized paper release liner for an easy peel.
<b>Thermal Conductivity:</b>	0.035 W/Mk
<b>Water Absorption:</b>	< 1%
<b>Ozone Resistance:</b>	Excellent
<b>High Temperature Use Limit:</b>	Adhesive 176°F (80°C) Foam 212°F (100°C)
<b>Directions:</b>	Peel the release liner away from the tape and wrap the tape around the piping.

TECHNICAL DATA	
Tensile Strength	Width >300 kPa Length >500 kPa
Performance Temperature	-40°F to 212°F
Adhesion Strength	>15 N/25MM

Foam insulation tape should be stored in its box at room temperature for prolonged use.
